TITLE:

Synthesis of alkylaminoalkylamides of substituted 2-aminopyrroles as potential local anesthetic and

antiarrhythmic agents. II: B-amines

Journal English

LANGUAGE: AB

The synthesis, local anesthetic and antiarrhythmic properties, and CNS toxicity of 14 2-(3-alkylaminoalkylamido)pyrroles are described. Most of the compds, exhibited local anesthetic activity by the quinea pig wheal test, with 7 showing comparable or greater activity than lidocaine. Most compds. also exhibited antiarrhythmic activity; 3 compds. had more potent activity than lidocaine. All compds. exhibiting antiarrhythmic activity also were toxic to the CNS. However, 2 of the 3 compds. having greater activity than lidocaine possessed more desirable therapeutic indexes.
